Melissa officinalis

Uses: Culinary/Medicinal/Beverage/Aromatic

Duration: Perennial (*hardy in zones 5-9*)

When to Sow: Spring/Late Summer/Early Fall/Anytime

Ease of Germination: Easy

Chives

Allium schoenoprasum

Uses: Culinary/Medicinal

Duration: Perennial (*hardy in zones 3-9*)

When to Sow: Spring/Late Summer/Early Fall/Anytime

Ease of Germination: Easy

Common Comfrey

Symphytum officinale

Uses: Culinary/Medicinal

Duration: Perennial (*hardy in zones 3-8*)

When to Sow: Spring/Late Summer/Early Fall/Anytime

Ease of Germination: Easy

Lovage

Levisticum officinale

Uses: Culinary/Medicinal/Beverage/Industrial

Duration: Perennial (*hardy in zones 5-8*)

When to Sow: Spring/Late Summer/Early Fall/Anytime

Ease of Germination: Easy

Italian Parsley

Petroselinum crispum neapolitanum

Uses: Culinary

Duration: Biennial (*hardy in zones 6-9*)

When to Sow: Spring

Ease of Germination: Easy

Rosemary

Rosmarinus officinalis

Uses: Culinary/Medicinal/Beverage/Aromatic/
Industrial

Duration: Perennial (*hardy in zones 8-10,11+*)

When to Sow: Spring/Anytime

Ease of Germination: Moderate

Cherry Chief Sage

Salvia greggii 'Cherry Chief'

Uses: Culinary/Aromatic

Duration: Perennial (*hardy in zones 7-10*)

English Thyme

Thymus vulgaris

Uses: Culinary/Medicinal/Aromatic/Industrial

Duration: Perennial (*hardy in zones 4-9*)

When to Sow: Spring/Late Summer/Early Fall/Anytime

Ease of Germination: Easy

Lemon Thyme

Thymus x citriodorus

Uses: Culinary/Medicinal/Aromatic

Duration: Perennial (*hardy in zones 4-9*)

Raintree

BERRIES

Blueberries

Polaris 4' Early ripe

Palace Purple Heuchera

Gay Feather

Peony

Russian Sage

Phlox (david)

Black-eyed Susan

Autumn Seedum

Clover undersowing

Ladino White Clover

Spring Bulbs:

Tulips

Iris

Orange Mint

Mentha aquatica 'Citrata'

Uses: Culinary/Medicinal/Beverage/Aromatic/Industrial

Duration: Perennial (*hardy in zones 4-9*)

(Eau de cologne mint; Bergamot mint) Treasured for its very special fragrance. Its hint of citrus is tantalizing in fruit punches, teas and potpourris. The oil is an ingredient in chartreuse and perfumes.

Spearmint

Mentha spicata

Uses: Culinary/Medicinal/Beverage/Aromatic/Industrial

Duration: Perennial (*hardy in zones 4-9*)

Scotch Spearmint

Mentha x gracilis

Uses: Culinary/Medicinal/Beverage

Duration: Perennial (*hardy in zones 5-9*)

(American apple mint; Red mint) This mint is one of the back bones of the American mint oil industry. It is the source of spearmint oil used mainly to flavour chewing gum. Has characteristic dark red or reddish purple stems and dark green leaves. Excellent sweet scent and flavour. Ht. 30-45cm/12-18".

Chocolate Mint

Mentha x piperita piperita

Uses: Culinary/Medicinal/Beverage/Aromatic/Industrial

Duration: Perennial (*hardy in zones 4-9*)

For years we resisted offering chocolate mint because we were convinced the 'chocolateness' was a figment of someone's imagination. But customers continued to insist that there is such a thing and brought us plants to prove it. As we suspected, most are pretty much the same as true peppermint, but one strain surprised us. Hard to pin down as truly 'chocolate', but its clean fragrance of peppermint is overlaid by something else that adds up to a striking 'peppermint patty' scent. A real treat for discriminating noses!

Lemon balm

Echinacea

Echinacea purpurea

Uses: Medicinal

Duration: Perennial (*hardy in zones 3-10*)

When to Sow: Spring/Late Summer/Early Fall

Ease of Germination: Easy

(Coneflower) Highly regarded blood purifier used in the treatment of diseases caused by impurities. Said to increase bodily resistance to infection by strengthening the immune system. Rich reddish-purple daisies appear from July to September.
